JD DeMotte is the cities storm water representative, He also serves as the cites Building Official, Mr DeMotte visits Stokenbury farms multiple times throughout the week to perform building inspections as well as observe that BMP's are being followed to prevent silt and other debris from entering the storm drain system.

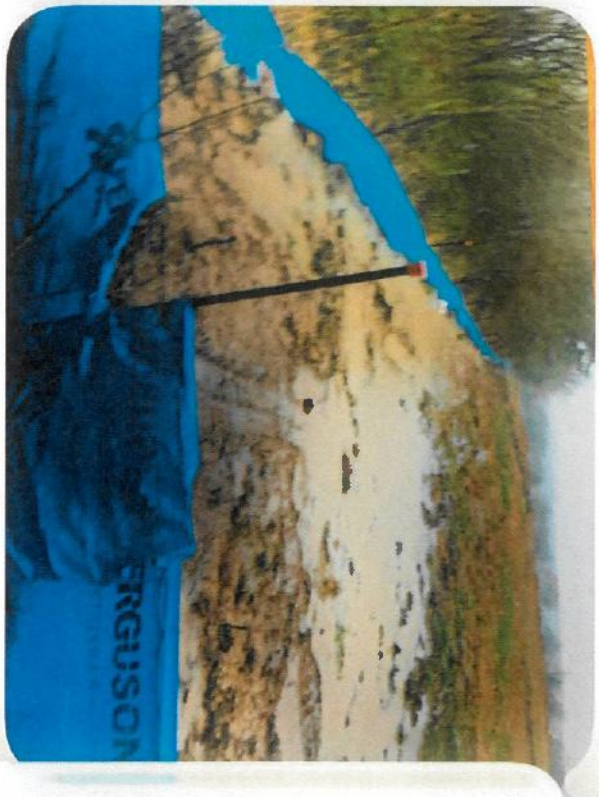

Mr, DeMotte also performs building inspections at the construction site adjacent to Dollar General and ensure that no silt or debris is not entering the waters of the state, a buffer was in place until the mesh was installed under the gravel to prevent erosion. The front parcel was only disturbed once utility connections were performed. The site adjacent to Dollar General is in 3 parcels each less than 1 acre. Typically SWMPP are only required for projects over 1 acre. It was the cities impression that the developer was going to do construction in phases rather than all at once. Found, Mr DeMotte speaks directly with the supervisor on site If any violations are , this generally takes care of the issue to ensure BMP's are being practiced.

All photos and video will be provided in this email.

Mr DeMotte did receive a phone call from someone who identified themselves as a representative for ADEQ in refence to a SWMPP not being in place for the Construction site adjacent to Dollar General.

Good morning sir, can you ensure that Steelworx cleans up the track out currently happening on Saydi and Jason street
Yes sir. Already received some pictures and asked SWX to clean up.
Thank you much
