City of Harrison

Luke Feighert, CPA
Finance Director
financedirector@cityofharrison.com

Effective February 16, 2018, adjustments will be calculated for customers that provide a detailed receipt showing they have fixed a leak using the following guidelines:

- Adjustments for water will be done if the number of gallons used for the month is over 10,000 gallons above the average of the last 6 months usage.
- Adjustments for sewer will be done for the number of gallons above the average of the last 6 months usage
    - Adjustments will differ depending on where the leak occurred (inside the house or outside the house).
- Adjustments for sales tax on water charges that have been adjusted off the original bill

Please note that if the customer has not been at their particular location for 6 months, the City has the discretion of calculating a reasonable average of the number of months the resident has occupied that location.

Thank you!
